

ALUMINIUM COMMERCIAL MARKET OVERVIEW 2020

Insight Data have combined its highly detailed statistics collected within three of the five databases they offer, with an in-depth market research campaign targeted at the top UK aluminium curtain walling and shopfront fabricators.

The commercial aluminium market within Insight Data's fenestration database, typically consists companies fabricating products on a single storey (shopfronts) or on a multi-storey (curtain walling) basis. Historically, the commercial aluminium market has been very consistent and remains a strong sub-sector of the Fenestration sector.
